Drupal 10.3.x core		10.3.0 release, June 17		
Drupal 11.0.x core				Dec 9 release

2024 maintenance/upgrade suggestions

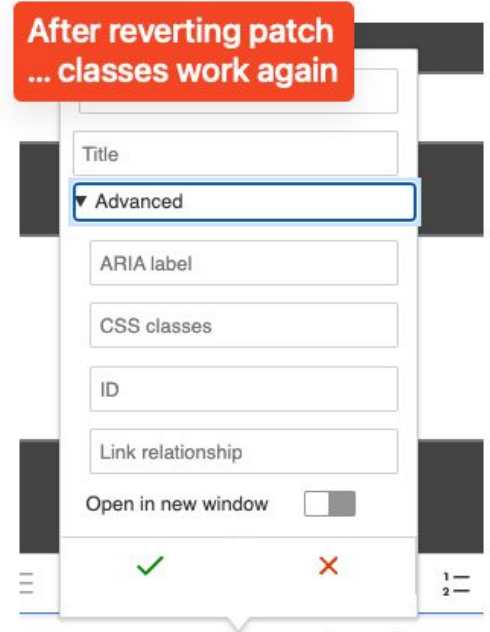

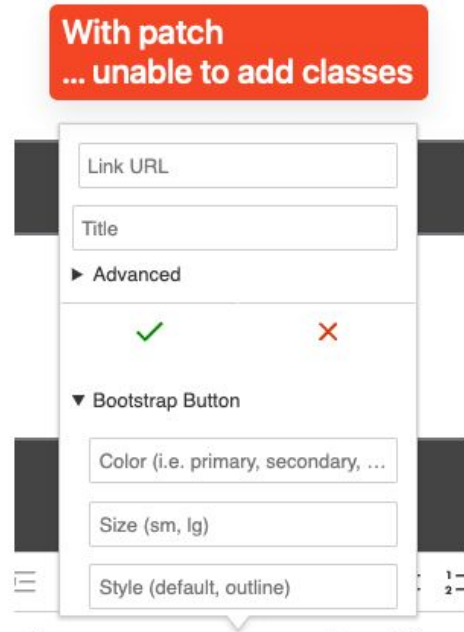

1. To **Plan Q2(after June release) 2024 for upgrading Drupal core and distribution.** **Q3 the latest, but security issues may arrive*
2. In order to reduce effort - plan quarterly updates of the distribution for the components with small effort
3. Be ready to apply security hotfixes for specific components (up to 8h of development effort) - see #developers channel alerts - *rare*

Text Editor Button Bug

Using Button Classes in the Text Editor

- The December release added a fix that was intended to improve the process of adding buttons, but the initial fix did not apply well.
- A new solution is in progress, but in the interim your development partner can [revert the fix](#).

Traction Rec Integration

Traction Rec/Activity Finder Integration

- Final phases of development and testing
- Available in the March release, but contact your development partner if you want to start testing sooner

- The project Readme contains detailed instructions for configuration
- Setup will require coordination between both a development partner and a Salesforce admin
